In this edition:

VIDEO SPOTLIGHT: When to Consider ADT Therapy After Biochemical Recurrence in Prostate Cancer

Experts in prostate cancer discuss considerations for initiating ADT therapy after definitive treatment in patients with prostate cancer in the context of biochemical recurrence.

thinking.

I encourage everyone to take a few minutes and watch this video presentation; it succinctly shows a change in the way of thinking about rising PSA after surgery or radiation therapy. PSA doubling time, initial Gleason score, and genetic factors all play a part in the decision. Treatment choices now include watchful waiting in low-risk cases; this is a change from previous
