The Future of Prostate Cancer Treatment: An In-Depth Look at Emerging Personalized Strategies.

Video Conference with Daniel Spratt, M.D.

Urotoday, November 15, 2023

<https://www.urotoday.com/video-lectures/lugpa-2023/video/mediaitem/3708-the-future-of-prostate-cancer-treatment-an-in-depth-look-at-emerging-personalized-strategies-daniel-spratt.html>

I hope you are having a great weekend.

Targeted radiation therapy via MRI guided SBRT can be an effective control of various oligometastatic cancers even without chemotherapy and / or ADT's. That's a quick summary of some of the exciting discoveries discussed in the above article presenting a talk by Daniel Spratt, MD, Chair and Professor of Radiation Oncology, UH Cleveland Medical Center, Seidman Cancer Center, Case Western Reserve University, Cleveland, OH who is pioneering the combined use of Artificial Intelligence, genetics and targeted radiation to treat prostate cancer more effectively and with fewer adverse effects.

The above link takes you to a video. If you've seen Dr. Spratt at Prostate Forum, you know he's a concise and patient friendly communicator. So, there's no need to summarize his talk any more than I have.

For more about genetics, AI and creating personalized prostate cancer treatments, check out last year's Prostate Forum presentations by the following experts at

<https://www.prostateforum.org/presentations>.

Daniel Spratt, M.D. October 2023

Mitchell Gross, M.D. September 2023

Pooya Banapor, M.D. August 2023

Here's Dr. Spratt's contact information:

So much is improving so quickly. I hope you stay with the Prostate Forum during this exciting time and join our support and information meetings and presentations. Get some coffee and browse our website at www.ProstateForum.org.

Warmly,

CKM
