WEEKLY NEWS UPDATES IN PROSTATE CANCER

In this edition:

German Treatment of Prostate Cancer: the Innovative Drug Lutetium-177

German hospitals are offering a 3-4 day inpatient treatment called Lutetium 177. This is a therapeutic radionuclide which accumulates in tumors and metastases, irradiating them with beta particles. This is the most up to date article I have seen for the German experience. Lutetium-177 is only available in the USA via clinical trial.
