WEEKLY NEWS UPDATES IN PROSTATE CANCER

In this edition:

FDA Grants 510K Clearance to Exablate System for Prostate Cancer

The FDA has given 510k clearance to the Exablate system, which uses high intensity ultrasound to control locally-confined prostate cancer. This system is very precise for the treatment of focal prostate cancer; it uses real time MRI images to treat focal lesions and studies show it to be very accurate. Focal therapy is an underused choice for many prostate cancer patients.
