Good Saturday evening.

PSMA-PET scans are more selective and more sensitive than conventional imaging. Here, four expert physicians discuss how these scans are changing the way they practice medicine, criteria for ordering PSMA-PET scans and how PSMA-PET scans can better serve patients and doctors. Listen carefully as one of the presenters mentions how better educated patients are pushing the diagnostic process further along. And, the presenters discuss this diagnostic tool in patient friendly language.

Grab some coffee and a bagel, start at the link above for episode one and keep watching to episode 14. We are witnessing cancer treatment history in the making.

See you soon!
