## WEEKLY NEWS UPDATES IN PROSTATE CANCER

*In this edition:*

# FDA Approves Piflufolastat F 18 PSMA PET Imaging Agent for Prostate Cancer

The FDA has approved piflufolastat F 18 injection, a prostate-specific membrane antigen–targeted positron emission tomography imaging agent to identify suspected metastasis or recurrence of prostate cancer- it is finally official. This gives some competition in the PSMA arena, and should be available to more people and the backlog (like at UCLA) will start to diminish.
