“Hospital building spree could turn Irvine into nation’s next big health brand”.

Orange County Register, by Yusra Farzan, July 23, 2023

Read it here for FREE: <https://www.hoag.org/articles/hospital-building-spreecould-turn-irvine-into-nations-next-big-health-brand/>

Starting in the early 1990’s the Forum’s Directors featured the best medical doctors and others for their presentations. There were (and still are) experts from Santa Barbara, Duarte, West Los Angeles, Marina Del Rey, Palm Springs and other areas some distance from Orange County who have or currently present to us. This meant that our Orange County Forum friends had to travel more than a hundred miles or more to get care or fight traffic “in town” to receive care from our featured experts. Good news. Orange County now has several cancer centers of excellence.

The above article points to a present and future for cancer patients of all kinds who can now access care closer to home. And, it’s great news for so many who live in Riverside and San Bernardino Counties as well as residents of the Southeast San Gabriel Valley whose drive to Orange County will be easier than seeking care in Los Angeles and perhaps less expensive, too. One can reach Orange County via John Wayne Orange County Airport, Long Beach Airport and Ontario Airport, all more navigable than Los Angeles International thus reducing stress and expense for so many who do not have an equivalent level of care close to them.

Click the link to read the article and as always we look forward to seeing you at our meetings and presentations.

Warmly,

CKM
